17.	Hatch with Escape Hatch Inside with Frame (Small)
18.	Hatch with Escape Hatch Outside (Small)
19.	Waffle Pattern Hatch Inside & Frame (Small)
20.	Waffle Pattern Hatch Outside (Small)
21.	Circular Escape Scuttles

ASSEMBLY OF DOORS AND HATCHES

To assemble the doors, fit the outside panel onto the inside panel, ensuring that the etched relief is outermost. There are more door fronts in the set than insides, because it is assumed that not all of the doors will be fitted in the open position.

When assembling the hatches, the same method applies as with the doors. The large hatches will be supported by a stay on each side. This can be made from stretched sprue or wire.
